

Krish Pavuluri

QA Automation Engineer · Test Architect · AI-Assisted Automation

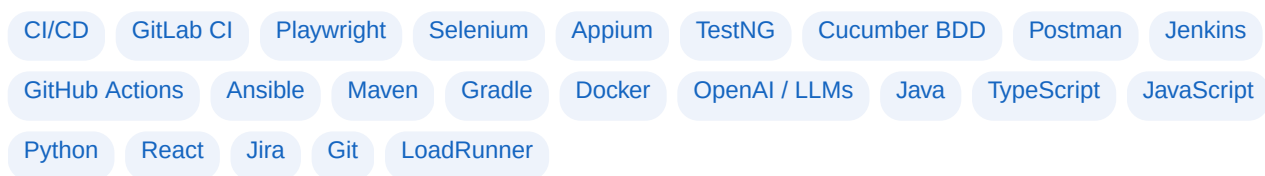

Montreal, QC | 438-928-0928 | krishpavulur@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Quality Assurance professional with 10+ years of experience testing native and React Native iOS and Android apps on real devices, emulators, and simulators, plus mobile web and hybrid flows with Playwright. Designs scalable automation frameworks with TestNG, Cucumber, and Playwright Test, validates REST and SOAP services with Rest-Assured and Playwright's built-in API testing, and ships rich Extent / Allure / Playwright HTML reporting wired into Jira and Slack. Configures Jenkins, GitLab CI, and GitHub Actions pipelines to run Selenium, Appium, and Playwright suites as part of continuous testing.

Hands-on with AI-assisted automation: implementing AI services through containerized APIs, building and testing AI chatbot integrations, and using LLMs to accelerate test design, triage, and self-healing locators. Delivers and maintains regression suites at 90%+ test coverage with strong pass rates, treating tests as production code — kept up to date with the app to keep false fails low and trust in CI high.

CORE SKILLS

PROFESSIONAL EXPERIENCE

QA Automation Engineer

April 2025 – Present

UFCU · Austin, TX

Banking automation on Symitar and Backbase using TestNG, Java, Playwright with TypeScript, GitHub Actions, and Azure DevOps in an Agile environment.

- Delivered 90%+ regression coverage across functional and integration scenarios with a strong pass rate; treated tests as production code and updated them alongside features to keep false fails low.
- Configured GitHub Actions pipelines so Java backend and Playwright frontend suites run on every push for fast, trustworthy regression feedback.
- Designed TestNG and BDD frameworks in Java for backend and API testing with reusable components and custom annotations to keep maintenance low.
- Used AI-assisted tooling and LLMs to accelerate test design, locator triage, and review of regression failures on Playwright traces.
- Built and maintained Playwright/TypeScript suites for UI and end-to-end banking flows, expanding frontend coverage and surfacing defects earlier in the cycle.
- Automated SOAP API validation with SOAP UI and integrated results into Azure DevOps for real-time reporting against user stories.

Stack: Playwright · TypeScript · TestNG · Java · GitHub Actions · Azure DevOps · SOAP UI

Automation Test Architect — Mobile & Codeless

February 2025 – April 2025

RobotActions.com · Montreal, QC

Led codeless automation tooling for native and React Native iOS/Android apps with deep CI/CD and AI integrations.

- Configured Jenkins, GitLab CI, and GitHub Actions pipelines (Maven/Gradle) for parallel device-farm execution.
- Mentored team on framework patterns, AI-assisted authoring, and codeless best practices.
- Implemented AI services as containerized APIs (Docker) for AI-assisted element selection, AI chatbot test orchestration, and flake triage — callable from the codeless tools and from CI.
- Designed TestNG and Cucumber frameworks with custom annotations for modular, reusable React Native and native test suites.
- Built a codeless record-and-playback platform for iOS (XCUITest, WebDriverAgent) and Android (UiAutomator, scrpcy), reducing manual testing by ~45%.
- Validated REST APIs with Rest-Assured and surfaced results via Extent and Allure reports.

Stack: Appium · XCUITest · UiAutomator · TestNG · Cucumber · Docker · AI APIs · Rest-Assured

Automation Test Architect — Mobile App Enhancement

June 2018 – January 2025

Bell Canada · Montreal, QC

Mobile automation across Bell, Virgin, Lucky Mobile, and PC Mobile native, React Native, and hybrid apps.

- Configured Jenkins and GitLab CI pipelines (Maven/Gradle/TestNG listeners) and integrated results into Jira and Slack for real-time defect tracking.
- Achieved 95% functional and regression coverage across native and React Native apps; kept suites green by aggressively retiring flaky tests and updating selectors with each release.
- Developed TestNG + Cucumber frameworks with Page Object Model and custom annotations, cutting maintenance ~35%.
- Dockerized browsers and helper services to run on a unified grid for multi-platform parallel execution; later extended the same approach to host AI helper services as APIs alongside the test grid.
- Built a mobile automation lab with Appium Grid, WebDriverAgent, XCUITest, and scrpcy running on real devices, Android emulators, and Xcode simulators.
- Automated REST API validation with Rest-Assured and Postman; published Extent and Allure reports for stakeholder visibility.

Stack: Appium · Selenium · TestNG · Cucumber · Docker · Jenkins · GitLab CI · React Native

Performance and Automation Specialist

January 2017 – June 2018

CN Railway Company · Montreal, QC

Performance and automation testing for mobile and SAP applications, including React Native components.

- Configured Jenkins for automated test execution integrated with TFS for version control and test management.
- Built TestNG-based modular frameworks with custom annotations to improve execution efficiency.
- Authored Selenium / Appium / TestNG automation for native and React Native mobile apps on real devices and emulators.
- Automated API testing with SOAP UI and Rest-Assured; reported results via Extent.
- Ran LoadRunner mobile-protocol performance tests, monitored with Dynatrace and Perfmon.

Stack: LoadRunner · Selenium · Appium · TestNG · Jenkins · SOAP UI

QA Consultant — LoadRunner Specialist

April 2016 – November 2016

CGI — Immigration Quebec · Montreal, QC

Performance and automation testing for an online immigration portal including mobile access.

- Automated API testing with SOAP UI; configured TFS for defect tracking and CI integration.
- Developed LoadRunner scripts for web and mobile HTTP protocols, executing on real devices and Android emulators.
- Executed load and stress tests, monitored with Perfmon, and surfaced bottlenecks to dev teams.

Stack: LoadRunner · SOAP UI · TFS · Perfmon

Performance Test Lead

September 2015 – March 2016

ATB Financial · Calgary, AB

Performance testing for a mobile hybrid banking application with CI/CD integration.

- Configured Jenkins for automated test execution integrated with CRM and banking services for test data.
- Documented test cases in HP ALM with comprehensive coverage of critical flows.
- Authored LoadRunner scripts for mobile and web services, simulating 3000+ virtual users on real devices and emulators.
- Monitored server performance with Perfmon and analyzed SAP server logs for defect tracking.

Stack: LoadRunner · Jenkins · HP ALM · Perfmon

QA Consultant — LoadRunner Specialist

July 2014 – August 2015

CGI — Immigration Quebec · Montreal, QC

Performance testing for an immigration portal including mobile access.

- Developed LoadRunner scripts for web and mobile HTTP protocols, testing on real devices and emulators.
- Monitored server resources with Perfmon and provided improvement recommendations.
- Integrated test execution with TFS for defect tracking in an agile environment.

Stack: LoadRunner · Perfmon · TFS · SQL Server

EDUCATION

Bachelor of Science

2007 – 2011

SRM University, India
